

Annexure A

On 12 December 2023, the Minister in the Presidency responsible for Electricity, Kgosientsho Ramokgopa, alongside the Deputy Director General of the Department of Mineral Resources & Energy, Zizamele Mbambo, announced that Government would begin to procure 2500MW of nuclear generation capacity.

In terms of the Promotion of Access to Information Act (No. 2 of 2000), I request the following information:

- The record of decision to procure the specified nuclear generation capacity.
 - The demand analysis conducted for the rationality of the decision, based on the envisaged load profile for 2030.
 - The required generation profile to meet 2030 goals.
 - Financial and cost-benefit analyses conducted for the specified nuclear generation capacity.
 - Nuclear feasibility study done for the specified nuclear generation capacity.
-
