**TO: VRP SKOSANA
SECRETARY TO THE LEGISLATURE**

**FROM: MR. M K CHILOANE
MEMBER OF EXECUTIVE COUNCIL
EDUCATION AND SPORTS, ARTS, CULTURE AND RECREATION**

SUBJECT: QUESTION POSED BY THE LEGISLATURE QUESTION 5. ED030

PURPOSE:

With regard to the Portfolio Committee meeting held on 8th of August 2024, where it was stated that all public schools in Gauteng have internet connectivity, could the MEC please indicate:

QUESTION 1:

Which school have sourced their own connectivity?

ANSWER:

All Gauteng Department of Education (GDE) schools have Internet connectivity, either through departmental-sponsored Wide Area Network (WAN) services or by sourcing their own connectivity solutions, which include Fiber, APN (Access Point Name), or mobile routers. The GDE currently oversees 2221 Public Schools, of these, 605 of are priority sites, of the priority sites, 583 are part of the Department's Schools of the Future Programme and the 22 are Teacher Development Centres. Part of this programme includes the installation of WAN and Local Area Network (LAN) as part of the Gauteng Broadband Network (GBN) connectivity rollout. 1639 of the 2221 Public Schools currently have their own internet connectivity, primarily supporting administrative functions such as communication. The list of 1639 schools that have their own connectivity is attached as Annexure A.

SUBJECT: QUESTION POSED BY THE LEGISLATURE QUESTION 5. ED030

QUESTION 2:

Which school only have connectivity for the administrators?

ANSWER:

All schools within the province, whether they are part of the Schools of the Future Programme or the public school, have connectivity specifically for administrative use and the list is attached as Annexure A.

QUESTION 3:

How does the department define a school as being connected?

ANSWER:

The GDE defines a school as being connected when both Wide Area Network (WAN) and Local Area Network (LAN) infrastructure are in place. This connectivity should not be limited to administrative blocks but must extend into classrooms.

For a school to be fully recognised as "connected," the following criteria must be met:

- **WAN Connectivity:** The school is connected to the Internet through a broadband connection, allowing access to external services and resources;
- **LAN Connectivity:** The Local Area Network covers the entire school, including classrooms, with each classroom having at least two data points (Ethernet ports or wireless access points); and
- **Classroom Access:** Each classroom is equipped with a minimum of two data points, ensuring that digital resources and devices, such as Wireless Access Points (APN) computers and printers, can be connected to the network.

This model ensures that both administrative and teaching spaces benefit from connectivity, enabling a comprehensive digital learning environment. Wireless Access Points (WAP) may also be added where necessary to extend wireless connectivity, particularly in larger classrooms or schools with more dynamic space usage.

SUBJECT: QUESTION POSED BY THE LEGISLATURE QUESTION 5. ED030

QUESTION 4:

Which schools have no classrooms connected?

ANSWER:

Out of the 583 schools in the Department's Schools of the Future Programme, 375 schools still have classrooms that are unconnected. These schools are at various stages of implementation, and the Department is working diligently to close these gaps. The plan is to connect these schools by the end of Quarter 4 of the 2024/25 financial year. In addition, the remaining 1 726 public schools also have no connectivity to the classrooms, meaning that while their administrative blocks have internet access, learners and educators are not yet benefiting from fully connected classrooms. This lack of classroom connectivity hinders the ability to integrate digital learning tools effectively. List of schools that have no classrooms connected is attached as Annexure B.

Kind Regards

MR. M K CHILOANE, MPL
MEMBER OF EXECUTIVE COUNCIL: EDUCATION AND SPORTS, ARTS,
CULTURE AND RECREATION

DATE: 23/09/2024
